

Beyond the X's and O's.

We know you face many challenges each day and understand your passion and commitment for success with your program, your team or organization. We also know it requires a concerted effort and support to build and maintain that enthusiasm, that fire.

That's why we have made it our mission to provide quality leadership programs for coaches, players, teams, athletic directors and managers of all types.

We want the opportunity to assist administrators in their efforts to strengthen athletic programs through character education. Coaches have the opportunity to build character and infuse integrity into their programs every day through their words and actions.

I've been very successful coaching, predominately in soccer as well as baseball, archery and basketball. I was also an athlete in multiple sports. In my experience, the impact coaches have on their players is unmatched. Building a program that has a positive culture starts with the coach. With your vision and our experience and talent development offerings, we can work together to build that culture.

Our training and consulting is based on five essential principles for success:

- **Character**
- **Positive Outlook**
- **Enthusiasm**
- **Confidence**
- **Integrity**

"I have worked with hundreds of coaches over the years, and there is no doubt that DeAngelo Wiser is in a very elite class of coaches who understand the true value of sport. Coach Wiser's teams are not only well-coached, but his athletes are also highly motivated. Using a people-building methodology, Coach Wiser teaches all the values inherent in sport."

Jason Neidel, Head Coach,
Western Kentucky University Women's Soccer
